

EG Electronics
Casebook

Mobile Cradle – Commercial Vehicle

For in-cabin interface for smartphones to be used with insert to fit all smartphones. Cradle that can be used with various inserts in order to create a universal solution. EG Electronics supplies complete cradle to production sites and ensures supplier quality and supply.

USB Connector M12 – Material Handling

Vehicle HMI system have a M9 connector as output for Display image externally. To get compability in field a adapter cable with sealed USB connector was developed. EG Electronics manufactures a cable according to customer request and specifikations.

120mm² Battery Terminal – Mining Equipment

Battery cable 120mm² to carry high current loads are used in customer application. Bolt fixed battery terminal is used. EG Electronics introduced a series of bolt fixed battery terminals including 120mm² size. EG Electronics introduced Battery terminal for 120mm² with ensured fit to customer cable.

Signal Distribution system – Material Handling

Distribution of signals in crane application with focus on Enviromental sealing IP67 and production efficiency.

EG Electronics supplies complete system with cables and distribution boxes. Moulded connectors on customer specified cable.

EG Electronics manufacture customised cable solutions and supplies globally.
