

EGE BUSBARS

High voltage wire harness manufacture

High current and high voltage busbar with patent design and manufacture

High voltage relay with patent design and manufacture

High voltage connector with patent design and manufacture

We owned the whole basic manufacture chain, such as stamping, die-casting and inject molding, including the tool manufacture.

High current terminal with patent design and manufacture

Professional R&D Team. Quick response and accurate assessment is available with a group of professional engineers who owned over 5 years' experience within electric and EV products.

Advanced production facilities invested over 300 million provide customers products with high quality and low cost

Our test equipment can verify most of test, it makes sure the product we develop can meet customer's request.

Annual production capacity: 600,000 products

A special after-sale team support customers practical and professional advice and guidance.

Special incentive funds around 20 million RMB has been invested to R&D team which makes this team more diligent, innovative and rigorous.

Complete industry chain, advanced production equipment, quick response for sample, experienced engineers and high-efficient management system contribute to our superior products for customers.

- Space Saving
- Easy Maintenance
- Easy Installation
- Good heat Dissipation
- Good Electrical Conductive
