

WEAB Wermlands Elektronik AB was founded in 1995 and is a contract supplier of Electronics production.

The products manufactured are used worldwide in such diverse areas as the Commercial Vehicle sector, Defence, bioenergy, emergency lighting, weighing systems and more.

WEAB deliver to some of Europe's largest companies and to sole proprietorships.

Our business concept is a turnkey contract - Everything from idea to finished product, delivered directly to the end customer.

Build to Print Partner

Build to print is a process in which a manufacturer produces products, equipment, or components according to the customer's exact specifications. Typically an engineer provides drawings and the manufacturer is responsible for producing the part or piece of equipment to spec

WEAB work with customers to build bespoke solutions to meet their unique requirements, specializing on value added services in assembly and system manufacturing using existing supply chain and adopting production capabilities to the uniqueness of each project.

Our stringent quality assurance processes guarantee full material traceability, First Article Inspection testing (FAI) and Control Plans. Products and system solutions are designed to combat every level of rough handling, climatic and environmental hazard.
